Subject: Planning Application 14/17/0033

Dear Sirs, I feel I must object to the above application on several grounds, firstly the village has already had large developments and both the doctors and school are unable to cope with the increased numbers. The position of the development is not at all suitable for the village the land rises steeply and would totally overshadow the entry to the village and would be looking down on the houses in West View, plus the land does flood and houses in West View have been flooded and if built on there would be less surface area for the water to drain away from. The village is already overrun with cars possibly due to the fact we don't have a very good bus service and it is used as a rat run, some mornings I have great trouble getting out of the end of West View due to through traffic and adding more cars to the already crowded roads is just madness.

Mrs M Allen
101 West View.
Creech St Michael
