Good Morning

The email below has come in to us as corporate feedback.

This email relates to your service area, please respond to the Customer directly.

All corporate complaints, compliments and suggestions/comments need to be recorded on the corporate complaints Sharepoint site. This has not already been done. If you don't have access to 'Corporate Complaints' please contact Paul Harding who will arrange this for you.

Many thanks.

To whom it may concern in Planning

It's with a sad heavy heart I'm begging you to reconsider building houses on the beautiful field of Longaller Creech St Michael.

This beautiful village has already had so many more houses built in the last four years and the infrastructure cannot cope with it presently.

The schools here are oversubscribed as is the surgery. Building more houses would have a major impact on the roads both in the village and approach to Taunton and Bathpool.

Due to the elevated position of the proposed site it would destroy the character of the village dominating the approach in the surrounding houses.

People would just end up cutting through The centre of Creech St Michael to get on the a A358 making it very busy and very dangerous there has already been a few accidents at North End with cars driving on the pedestrian walk.

Please please please think very carefully how negative this would be for our beautiful little village we do not want to be one big housing estate we moved here to enjoy characteristics of this village please don't destroy them.

Kind regards  
Di & Mark Gallant
